INDICATORS OF RISKY OR EXCESSIVE DRINKING

- Drink more, or longer than you intend
- Try to cut down or stop drinking, but are not able to
- Have to drink more than you once did to get the effect you want
- Continue to drink even though it makes you feel depressed or anxious or adds to another health problem
- Loved ones and/or trusted friends have made comments about your drinking pattern
- Spend a lot of time drinking or thinking about alcohol
- Find that drinking often interferes with daily activities, family, friends and/or work
- Have been arrested or had other legal problems due to drinking
- Experience symptoms of withdrawal when you don't drink (withdrawal symptoms include: shakiness, sweating, tremors, headaches, anxiety, irritability, and/or insomnia)

ASSESS YOUR ALCOHOL USE • AUDIT-C ALCOHOL USE SCREENING TOOL

1. How often do you have a drink containing alcohol?

Hazardous Drinking Score

Men: 4 points or higher is considered hazardous drinking
Women: 3 points or more is considered hazardous drinking

However, when the points are all from Question #1 alone (#2 and #3 are zero), it can be assumed that the patient is drinking below recommended limits and it is suggested that the provider review the patient's alcohol intake over the past few months to confirm accuracy.

TIPS TO CUT DOWN ON YOUR DRINKING

Monitoring your alcohol use can help you prevent risky drinking:

- Set a daily and weekly drinking limit. Write down your limit and keep it with you.
- Pace your drinking. Have no more than one standard drink per hour.
- Record how much you drink each day.
- Avoid situations and triggers that cause you to drink.
- Ask a friend who does not drink to help you stay within your limit.
- Speak with your doctor and/or seek treatment for your alcohol use.
